SENIOR TECHNICAL PRODUCT MANAGER

Cybersecurity | ZTNA | ADC | WAF | SSL VPN | SASE | Cloud Security

Professional Summary

Senior Technical Product Manager with 10+ years of experience across cybersecurity, application delivery, secure access, data center infrastructure, and cloud networking products.

Experienced in defining product roadmaps, PRD/MRD, GTM strategy, pricing, competitive analysis, sales enablement, and customer-driven feature prioritization for ADC, WAF, SSL VPN, Zero Trust/ZTNA, and cloud security platforms.

Strong hands-on background in L2-L7 networking, high availability, load balancing, firewalls, DDoS protection, multi-cloud deployments, and enterprise security architecture. Worked closely with engineering, sales, support, partners, and customers to translate market requirements into successful product releases across AWS, Azure, and GCP environments.

Core Competencies

- **Product Management:** Product roadmap, PRD/MRD, GTM, pricing, feature prioritization, competitive analysis, sales enablement, partner training
- **Cybersecurity & Secure Access:** ZTNA, Zero Trust, SASE, SSL VPN, WAF, DDoS protection, firewalls, enterprise security architecture
- **Application Delivery & Cloud:** ADC, load balancing, traffic optimization, high availability, AWS, Azure, GCP, multi-cloud, cloud marketplace
- **Networking & Infrastructure:** TCP/IP, BGP, MPLS, VPN, routing, switching, segmentation, VMware, ESXi, NAS, SAN, backup infrastructure
- **Tools & Platforms:** Jira, Jenkins, GitLab, SVN, Bugzilla, OpenKM

Professional Experience

ARRAY NETWORKS INDIA PVT. LTD. | Bangalore

Senior Technical Product Manager | Apr 2024 - Present

- Owned product roadmap, release planning, and feature prioritization for ADC, Access Gateway/ZTNA, and management platforms.
- Defined and launched Zero Trust Access Gateway (ZTAG), including GTM readiness, pricing inputs, sales enablement, training, and competitive positioning.
- Created PRDs, MRDs, user stories, feature specifications, release notes, evaluation guides, and technical enablement content.
- Collaborated with engineering, QA, support, sales, and leadership teams to convert customer requirements into product features and release plans.
- Led competitive benchmarking and battlecards against F5, Imperva, Radware, NSFOCUS, and other application delivery/security vendors.
- Supported cloud marketplace readiness and deployment models across AWS, Azure, and GCP, while analyzing scalability, traffic behavior, latency, throughput, and high-availability requirements for enterprise deployments.
- Supported customer demos, technical presentations, RFP inputs, partner enablement, and customer-facing solution discussions.

Key Project: Zero Trust Access Gateway / ZTAG Product Launch

ARRAY NETWORKS INDIA PVT. LTD. | Bangalore

Senior Technical Engineer / Infra & Lab Architect | Jul 2021 - Apr 2024

- Supported product validation, technical enablement, cloud marketplace onboarding, and lab architecture for ADC and cybersecurity platforms.
- Tested and validated new product features across ADC, WAF, DDoS, SSL VPN, and management solutions.
- Created technical content including datasheets, solution briefs, evaluation guides, presentations, and demo material.
- Built and maintained enterprise demo/lab infrastructure for customer demos, testing, and partner enablement.
- Published and validated virtual appliances across AWS, Azure, and GCP marketplaces.
- Implemented engineering ecosystem tools including Jenkins, GitLab, SVN, Bugzilla, OpenKM, and Jira.
- Designed high-availability data center and lab infrastructure including firewalls, routers, VMware, NAS, SAN, DNS, DHCP, and AD services.
- Built DDoS scrubbing center infrastructure supporting WAF and security solutions.

Key Project: ADC and Cloud Marketplace Virtual Appliance Enablement

ARRAY NETWORKS INDIA PVT. LTD. | Bangalore

Internal IT & Lab Engineer | Jan 2020 - Feb 2021

- Managed engineering, support, and demo lab infrastructure for cybersecurity and application delivery products.
- Supported product testing, partner/customer training, vulnerability validation, technical troubleshooting, escalations, and reproduction of complex customer issues in lab environments.
- Configured and maintained ADC, WAF, DDoS, VMware, NAS, SAN, backup, and network infrastructure.

ORANGE BUSINESS SERVICES | India (Government Projects)

Network Specialist / Data Center Engineer | May 2016 - Jan 2020

- Managed large-scale government data center and WAN infrastructure for BSWAN and JHSDC projects.
- Worked on Cisco Nexus, ASR routers, MPLS, BGP, Fortinet firewall, Cisco ISE, and monitoring platforms.
- Supported network operations, routing, firewall management, SLA compliance, and high-availability environments.
- Participated in ISO 27001 and ISO 20000 audit and compliance activities.

S2 INFOTECH / ORANGE BUSINESS SERVICES

Technical Consultant | Jun 2015 - Jun 2016

- Worked on deployment, configuration, and support of HP routers, switches, WAN connectivity, and monitoring infrastructure across 140+ POP locations.
- Supported implementation, troubleshooting, and remote support for enterprise networking environments.

Independent Product Lab

Independent Zero Trust Secure Access Product Lab | Jan 2026 - Present

Built an independent Zero Trust secure access product lab to explore modern ZTNA-style architecture and SaaS-based secure application access.

Designed core workflows including:

- Control plane; gateway and connector tunnel; resource publishing
- JWT-based authentication; RBAC and policy enforcement; mTLS-secured communication
- Device posture validation; user/admin portal workflows

Technologies: Go, Docker, PostgreSQL, JWT, mTLS, RBAC, ZTNA, Secure Access

Key Achievements

- Designed and launched Zero Trust Access Gateway (ZTAG).
- Designed and built production-grade data center and lab infrastructure.
- Published virtual appliances on AWS, Azure, and GCP marketplaces.
- Implemented DDoS/WAF scrubbing infrastructure.
- Awarded Employee of the Quarter for DC migration project.
- Received Spot Award for performance and innovation.

Education

- MCA - Magadh University
- BCA - Punjab Technical University

Certifications

- CCNP Routing & Switching
- CCNA
- Fortinet NSE 1, 2, 3
- Palo Alto ACE
- IPv6 Forum Certified Network Engineer (Silver)

Additional Technical Exposure

- Networking: TCP/IP, BGP, VPN, routing, switching, HA
- Security: WAF, DDoS, firewall, Zero Trust, secure access
- Cloud: AWS, Azure, GCP, virtual appliances
- Performance Systems: Traffic analysis, latency, throughput optimization
